

ACTIVITY LIST: Learning to Present with Miss Gross

Learning Goal: To learn some different ways to present a final product.

- ★ Please explore at least two options.
- ★ If you have questions, please ask **at least two other students** before asking Miss Gross
- ★ You DO NOT have to have a complete final product for **any** of these presentations. This activity list is just for you to explore using at least two of them. The reason why you are saving your work is so that we as teachers may see what you've learned as you explored the activities of your choosing.
- ★ You may hang on to this activity list for future projects as you may want to explore more than 2 when you have more time.
