

Tinkercad How-To

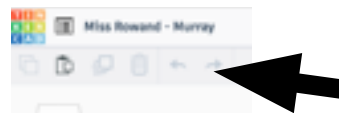

Start a New Tinkercad Creation:

- Click the Tinkercad Logo to bring you to the home page.
- Then find your teacher's name on the bottom left under projects

Save Your Tinkercad Creation:

- Click on the name in the top left corner and hit delete
- Put your name and the title of your project in the box
- Hit enter

Common Tinkercad Tools:

Drag and Drop A red cube being dragged from a library on the right to a work plane on the left.	Pull items from the right side onto your work plane
Screen Rotator A 3D view of a white rectangular object with rotation handles.	Allows you to rotate your screen to look at it from all angles
Size Changers A red cube with white squares at its corners, used for resizing. A black arrow points to one of the squares.	Use the white squares to make your items bigger or taller
Raiser A red cube with a small grey triangle on top, used for raising objects. A black arrow points to the triangle.	Allows you to raise your items so you can put them on top of other items
Holes A blue circular hole being placed into a grey rectangular object.	Use these to create empty spaces
