

FLIGHT PLAN ONE

Welcome to your very first Stallion International Flight!

To find Francis Petry, we need your help! As his pilot and cartographer, we need to fill in a map of Sanders and locate all of the important places around the school. Will you accept this mission and help us create our map? We are counting on you!

FLIGHT PLAN TWO

New Recruits,

You did a wonderful creating a map of Sanders. Now it's time for us to travel to the state's capital. Can you help us plot the course? Our map is blank, so we need to fill in all of the landform. But remember, Bernie can't swim, so make sure to avoid major bodies of water in your flight plan.

FLIGHT PLAN THREE

What an exciting trip to the state capital! Now it's time to learn more about the rest of Florida. First, however, we need a tour guide. Can you program Bernie's "dog" to help us visit all of the important landmarks in Florida?

FLIGHT PLAN FOUR

Oh croissant! We got to visit the Eiffel Tower, but we still need to learn about the different continents and oceans. Can you use our navigation robots to travel along the Prime Meridian and Equator after you've labeled the 7 continents and 5 oceans?

FLIGHT PLAN FIVE

We (aka Bernie) need your help to learn more about how to fly. Can you start your training on the flight simulators, completing Missions 1 and 2? You will need to work together as pilot and navigator to map out famous landmarks along the way on a coordinate grid. We are counting on your help!

FLIGHT PLAN SIX

Hello Recruits,

As we explore the land of film, we need your help identifying the five major regions of the United States and discover the weather that occurs in each location.

FLIGHT PLAN SEVEN

What's that in the sky? Is it a bird? Is it a plane? Yep it's a plane! It's time for you to design your own plane to help us find Francis. We also need a map (Beatrice loves maps!) of the states and capitals of America for our travels.

FLIGHT PLAN EIGHT

Recruits! Great News!

We've almost found Francis! We need to map out his journey so far and calculate the mileage between each location to see how far he has traveled. We also need to finish creating our plane so we can use it to safely find Francis!

FLIGHT PLAN NINE

Recruits,

You're help has been invaluable! We only have one last stop before we find Francis!! Now that you've mapped out the journey, we need to fly to him. Create your map in chalk and fly a drone to recreate his journey and land in his current location. You may want to add aeronautical improvements to your drone, using the knowledge you discovered when creating your plane!

Good luck!

- Bernadette and Beatrice "The B Team"
