

## Discoveries

## Discoveries

When completing the ELA, Science and Social Studies Learning units, you will need to ensure you are using the arrow buttons within the Learning Unit to navigate all the way through the Lesson. If you are only reading the 1<sup>st</sup> page then hitting the “next” button at the bottom of the screen, then you are not completing the lesson, and you will not get to the final assignment that needs to be submitted.

Notice, in this example from the 1<sup>st</sup> ELA lesson, there are 13 pages. You will need to do all of the activities that you are directed to do on different pages throughout the lesson. When you get to the final page they will give the final assignment that you need to complete to submit on the myLearning platform.

You should not click the “next” button at the bottom of the page until you have completed all of the pages on the lesson. When you are on the last page of the lesson it will say “Lesson Wrap Up”.
